

A favorable price and the speed of sale/purchase are the main conditions for a successful deal. When people want to buy/sell/exchange an apartment, house, villa, apartment, townhouse, penthouse, I recommend following a few steps:

1. Contact the Broker (Realtor - Real Estate Agent). Here is a list of links for feedback:

Broker's website >> [Open](#)

Telegram >> [Click](#)

Vkontakte page >> [Here](#)

2. Order a consultation at a convenient time and place. This can be a remote method of communication via the Internet or in real life (office, cafe, restaurant, airport).

3. Get recommendations.

4. Make an effective action plan.

Now you can start selling both independently and entrust it to professionals.

What is important to know :

An asset specialist uses unique methods of conducting transactions:

1. Online and offline auction transactions. In this case, the sale price can significantly exceed the starting price. The seller is very pleased).

2. Digital assets and cryptocurrency as forms and means of payment *. This depends on the location of the object. This method is popular in Dubai, Georgia, Turkey, Thailand and Bali. In Russia, remote purchases are just beginning to grow. For example, residents of Tyumen, Novosibirsk, Yekaterinburg often buy houses and apartments in Sochi, St. Petersburg, Crimea and Krasnodar via the Internet.

3. Proxy transactions. About this - privately during a personal consultation.

4. Another secret way to influence the price and speed up the sale can be obtained during a consultation.

Result

I am glad that now you know how to find growth points for the price of your assets and know where to find a specialist in asset protection and investments.

See you!
